Guide is based on the 2005 AISC Specification for Structural Steel Buildings (AISC, 2005), and includes guidance for designs made in accordance with load and resistance factor design (LRFD) or allowable stress design (ASD). This Guide follows the format of the 2005 AISC Specification, developing strength parameters for foundation sys-

Base Plate and Anchor Rod Design

Referring to Design Guide 11, calculating the effective moment of inertia of open web joists - AISC equations use the moment of inertia of the chords (only) of the joist. My question - How are you supposed to know the area of the chords and distance to their centroid when in the design stage (i.e. how am I suppose to know the area, centroid or moment of inertia of the chords in a 30K8)?
