listed on Centsless Books are only free if you're part of Kindle Unlimited, which may not be worth the money.

### **Auto Or Manual Focus**

Whereas manual focus works by letting you determine the point of focus. In other words: With autofocus, your camera does all the work to nail focus and ensure your shot is sharp. With manual focus, you do all the work to nail focus and get a sharp shot.

### **Manual Focus Versus Autofocus: Which One Should I Use?**

Autofocus and manual focus do the same thing. Both adjust the focus of the camera lens. But, with autofocus, the camera determines the sharpest focus using sensors devoted to measuring it. In autofocus mode, the photographer doesn't have to do anything. In manual mode, the photographer must adjust the lens focus by hand.

Switching to manual focus will give you complete control to enable this rather than having to line up the focusing points on your camera on the eyes prefocussing by pressing halfway down and then having to frame your shot. Manual focusing keeps this to be a much simpler process. Shooting Through Glass or Wire Fences

## **When is Manual Focus Better than Auto Focus?**

That's how easy it is to focus manually. The next challenge is to know where you should focus on the image. A rule of thumb is to focus 1/3 into the frame as this is normally where most of the image will be sharpest. However, this changes if you have a subject extremely close to the lens or far away.

have. Therefore, it is the best choice for still photography, hands down. On the other hand, manual focus is usually acceptable for still photography when an auto-focus system is likely to fail or if you're looking to focus precisely on a part of the image.

### **So When Should You Use Manual and Auto Focus? | Contrastly**

Manual Focus for Low Light Photography. If you do any night photography, chances are you probably won't be able to use auto focus. With the general atmosphere being extremely dark, it will be difficult and almost impossible to track a focus point using auto focus. In this case, I try to use the live view zoom in the method mentioned previously.

### **Should I use Manual Focus or Autofocus Setting?**

Manual focus is better for shooting through glass. If your street photography shots involve shooting from the street into a shop or restaurant window, you

### **Photography Basics #4: Digital Auto Focus vs Manual Focus ...**

Manual focus is for taking over when your camera's autofocus can't do a good enough job. For example, with Milky Way photography, almost no cameras can autofocus on the stars successfully, and manual focus is a must. The same goes in low-contrast environments like a thick fog. Most of the time, though, autofocus is more than good enough.
