In 2019 I bought myself into a Bellanca Super Decathlon. It is a very good aircraft to train in at affordable prices, compared to other more powerful aerobatic planes. I feel that it is good starter plane when learning aerobatics, because you really have to learn to manage the speeds in all maneuvers.

Following the acquisition of the Champion Aircraft Corp. in September 1970, Bellanca Aircraft continued the production of the Citabria. The fully aerobatic Citabria, model 8KCAB, is now named the Decathlon. Designed for loads of +6G and -5G, it can be flown in inverted flight for periods up to four minutes without loss of oil or oil pressure.

I just bought a Pilot Bellanca Decathlon 1/4 scale (96" WS) kit today for \$100! It is about 60% constructed already. The guy who built it moved twice during the build so I am going to have to spruce up some cracks and such but all in all it is a very solid plane and for \$100 with all of the work he put into it I CANNOT complain!
