The nature of perfection is that no want remains. The limitation that the soul experiences is on the earth, where it lives the life of limitation; yet its one desire is perfection. So every want is supplied, for the reason that the Perfect One, even in the world of variety, does everything possible to experience perfection.

For silicon diodes, the typical forward voltage is 0.7 volts, nominal. For germanium diodes, the forward voltage is only 0.3 volts. The chemical constituency of the P-N junction comprising the diode accounts for its nominal forward voltage figure, which is why silicon and germanium diodes have such different forward voltages.
