The classic experiment to detect the ether is the Michelson-Morley experiment. It uses interference to show a phase shift between light waves propagating the same distance but in different directions. The whole apparatus (and the Earth) is presumed to be traveling through the ether with velocity, v

Modern Physics Notes

Plaque at the location of the Stanford prison experiment The Stanford prison experiment (SPE) was a social psychology experiment that attempted to investigate the psychological effects of perceived power, focusing on the struggle between prisoners and prison officers.

Stanford prison experiment - Wikipedia

Classical conditioning involves placing a neutral signal before a naturally occurring reflex. In Pavlov's classic experiment with dogs, the neutral signal was the sound of a tone and the naturally occurring reflex was salivating in response to food.

Classical Conditioning: How It Works With Examples

Asch used a lab experiment to study conformity, whereby 50 male students from Swarthmore College in the USA participated in a 'vision test.' Using a line judgment task, Asch put a naive participant in a room with seven confederates/stooges. The confederates had agreed in advance what their responses would be when presented with the line task.

Asch Conformity Experiment | Simply Psychology

This book is intended as a general introduction to modern physics for science and engineering students. It is written at a level which presumes a prior full year's course in classical physics, and a knowledge of elementary differential and ... taken from experiment. Summaries are included at the end of each chapter, as
