Corporate finance - Wikipedia

Corporate finance has an internal consistencythat flows from its choice of maximizing firm value as the only objective function and its dependence on a few bedrock principles: Risk has to be rewarded, cash flows matter more than accounting income, markets are not easily fooled, and every decision a firm makes has an effect on its value.2.

Introduction to Corporate Finance

The basis of corporate finance is the separation of ownership and management. Now, the firm is not restricted by capital which needs to be provided by an individual owner only. The general public needs avenues for investing their excess savings. They are not content with putting all their money in risk free bank accounts.
