Folic Acid. Folic acid is very important. All women who can get pregnant should be sure to take 400 micrograms (μg) of folic acid every day, even if they aren't planning a pregnancy anytime soon. If a woman has enough folic acid in her body before and during pregnancy, it can help prevent major birth defects of the baby's brain and spine—including spina bifida.

What is Sexting and Is It Common Among Teens? | Lifespan

The Italian island of Sardinia has more than six times as many centenarians as the mainland and ten times as many as North America. Why? According to psychologist Susan Pinker, it's not a sunny disposition or a low-fat, gluten-free diet that keeps the islanders healthy -- it's their emphasis on close personal relationships and face-to-face interactions. Learn more about super longevity as ...
