If you find a free book you really like and you'd like to download it to your mobile e-reader, Read Print provides links to Amazon, where the book can be downloaded. However, when downloading books from Amazon, you may have to pay for the book unless you're a member of Amazon Kindle Unlimited.

### Global Warming Problem Solution Model

Escalating global warming is creating or exacerbating pandemics like COVID-19 in several ways: 1. Global warming is quickly destroying the natural habitat of wild animals. This forces the wild animals (like bats) into closer proximity with humans making it easier for the animal viruses (zoological viruses,) to cross over into humans.

### 20 Worst Climate Change and Global Warming Consequences - Job One for ...

FAQ 1.2: How Close Are We to 1.5°C? Summary: Human-induced warming has already reached about 1°C above pre-industrial levels at the time of writing of this Special Report. By the decade 2006–2015, human activity had warmed the world by 0.87°C (±0.12°C) compared pre-industrial times (1850–1900). If the current warming rate continues, the world would reach human-induced global warming of ...

### Chapter 1 — Global Warming of 1.5 °C - IPCC

The probability of a sea-ice-free Arctic Ocean 5 during summer is substantially higher at 2°C compared to 1.5°C of global warming (medium confidence). Model simulations suggest that at least one sea-ice-free Arctic summer is expected every 10 years for global warming of 2°C, with the frequency decreasing to one sea-ice-free Arctic summer ...

### Chapter 3 — Global Warming of 1.5 °C - IPCC

The importance of the Amazon rainforest for local and global climate. Tropical forests and woodlands (e.g. savannas) exchange vast amounts of water and energy with the atmosphere and are thought to be important in controlling local and regional climates 3.. Water released by plants into the atmosphere through evapotranspiration (evaporation and plant transpiration) and to the ocean by the ...

### Why is the Amazon rainforest important? | WWF - Panda

The root-source of global warming is the billionaires who profit from it — NOT actually the public who buy those products. Indeed, the public's opposition to global warming is clearly shown in an 8 February 2022 poll published by Politico, headlined "Poll: Citizens globally blast politicians' lack of action to combat climate change".
