Tutorial - User Guide - Intro¶ This tutorial shows you how to use FastAPI with most of its features, step by step. Each section gradually builds on the previous ones, but it's structured to separate topics, so that you can go directly to any specific one to solve your specific API needs. It is also built to work as a future reference.

Tutorial - User Guide - Intro - FastAPI
I used PHP in this tutorial, because it is most likely the language most familiar to Nettuts+ readers. That said, PHP, although designed for the web, is probably not the best language to use when working in a REST way, as it handles PUT requests in a completely different fashion than GET and POST. Beyond PHP, you might consider the following:

A Beginner's Guide to HTTP and REST
As part of the tech industry's general anti-racism work, some groups have begun to use alternate names for the default branch (we are using "primary" in this tutorial, for example). In other documentation and discussions, you may see "master", or other terms, used to refer to the primary branch.

An Intro to Git and GitHub for Beginners (Tutorial)
