Gulls Of North America Europe

The European herring gull (*Larus argentatus*) is a large gull, up to 66 cm (26 in) long. One of the best-known of all gulls along the shores of Western Europe, it was once abundant. It breeds across Northern Europe, Western Europe, Central Europe, Eastern Europe, Scandinavia, and the Baltic states. Some European herring gulls, especially those resident in colder areas, migrate further south in ...

European herring gull - Wikipedia

Gulls, terns, and skimmers Order: ... Loons, known as divers in Europe, are a group of aquatic birds found in many parts of North America and northern Europe. They are the size of a large duck or small goose, which they somewhat resemble when swimming, but to which they are completely unrelated.

List of birds of Germany - Wikipedia

Strait Of Gibraltar. A strait is defined as a narrow water body bordered by landmasses that connects two larger water bodies. Straits can be formed due to the movement of tectonic plates or by the fracture of an isthmus. The Strait of Gibraltar is a narrow water passage that connects the Atlantic Ocean with the Mediterranean Sea and is also one of the world's busiest waterways.
