Java Complete Reference 8th Edition

The class is at the core of Java. It is the logical construct upon which the entire Java language is built because it defines the shape and nature of an object. As such, the class forms the basis for object-oriented programming in Java. Any concept you wish to implement in a Java program must be encapsulated within a class.

In machine learning, feature selection is the procedure of selecting important features from the data so that the output of the model can be accurate and according to the requirement. Since in real-life development procedure, the data given to any modeller has various features and it happens all the time that there are various features given in the data which are not even required for the ...

A Complete Guide to Sequential Feature Selection

In particular, you should stay away from C: The Complete Reference (4th Edition, 2000), known in some circles as C: The Complete Nonsense. Also do not use the book Let Us C (16 th Edition, 2017) by Yashwant Kanetkar. Many people view it as an outdated book that teaches Turbo C and has lots of obsolete, misleading and incorrect material.
