in children: what you
need to know.

Language development
is a critical part of child
development. It
supports your child's
ability to communicate,
and express and
understand feelings. It
also supports thinking
and problem-solving,
and developing and
maintaining
relationships.

unfolds in a predictable sequence for most children, beginning with cries, grunts, and babbles in the first few months and progressing to those anticipated first words around a baby's first birthday. Parents tend to intuitively foster language development through everyday moments of talking, singing, and reading to their children.
