Luenberger does an incredible job of leaving significant holes in his lessons. In addition to this, many of his examples contain seemingly obvious errors. I have no doubt that he is an intelligent man and an expert in the field of Investment Science, but I confidently claim that he is a terrible educator and author. This is a book of scratch ...

George Ellis, in Observers in Control Systems, 2002. 8.1.4.4 Sensor Noise. Luenberger observers are most effective when the position sensor produces limited noise. Sensor noise is often a problem in motion-control systems. Noise in servo systems comes from two major sources: EMI generated by power converters and transmitted to the control section of the servo system, and resolution limitations ...
