The electric fuel pump is submerged in fuel inside the tank, attached to a module or hanger assembly that also includes a float and sending unit that supplies fuel level information to the dash gauge. A strainer is attached to the pump to filter the fuel. The strainer is your fuel system's first line of defense, and if it fails or becomes clogged, the pump can be damaged and/or fuel pressure ...

Replacement Fuel System Parts & Components - CARiD.com

The Exhaust Gas Recirculation (EGR) system sends a metered amount of engine exhaust into the intake air stream to cool combustion and reduce NOx. It may sound odd to cool with hot exhaust, but since it is an inert gas (contains no oxygen) and will not burn, combustion temperature is reduced.
