Both the Nortel Bay BPS2K and the Nortel Bay 470 have CLI access available if they are running recent versions of code. I run BPS2K's at FW 3.6.0.6 and SW v3.2.1.05, and 470's at FW 3.6.07 and SW v3.7.2.13 or higher; CLI access and the "sho run" command are both available at these levels. Bay 470's have the option to run Menu or CLI as default.
