Background: Time spent in sedentary behaviors is an independent risk factor for several chronic diseases (e.g., cardiometabolic diseases, obesity, type 2 diabetes, and hypertension). Recently, interventions to reduce sitting time at work (a prominent sedentary behavior) have been developed and tested. Organizational culture plays a critical role in the success of workplace interventions.

Therefore, Lutz Allen et al. (2013) suggested that individuals must incorporate and adopt the behaviors of the transformational leadership style for successfully managing and implementing organizational change. Thus, this study assumes that transformational leadership will be positively associated with OCC. Therefore, it is postulated as follows:

### Leadership Styles in Relation to Employees' Trust and ...

Generally, three main perspectives on organizational resilience can be distinguished. The first group of scholars understands resilience as an organization's ability to resist adverse situations and/or the ability to recover after disturbances and return to a normal state (e.g., Horne 1997; Horne and Orr 1998; Robert 2010).For example, Robert defines organizational resilience as "a firm ...

Anderson and Pearson further explained that a schema is an abstract knowledge structure. It is abstract in the sense that it summarizes what is known about a variety of cases that differ in many particulars. It is structured in the sense that it represents the relationship among its component parts (Carrell, 1988). 2.2.2 Three Types of Schema
