Peter Stiling Ecology

A Ecologia é a especialidade da biologia que estuda o meio ambiente e os seres vivos que vivem nele, ou seja, é o estudo científico da distribuição e abundância dos seres vivos e das interações que determinam a sua distribuição. [1]As interações podem ser entre seres vivos etou com o meio ambiente. A palavra "Ökologie" deriva da junção dos termos gregos "oikos", que significa ...

Ecologia - Wikipédia, a enciclopédia livre

Grassland vegetation can vary considerably depending on the grassland type and on how strong it is affected by human impact. Dominant trees for the semi-natural grassland are Quercus robur, Betula pendula, Corylus avellana, Crataegus and many kinds of herbs.. In chalk grassland, the plants can vary from height to very short.Quite tall grasses can be found in North American tallgrass prairie ...

Grassland - Wikipedia

Le sumac grimpant, herbe à puce, bois de chien, sumac vénéneux ou poison ivy (Toxicodendron radicans, anciennement Rhus radicans) est une liane de la famille des Anacardiaceae, comme les anacardiers et les pistachiers.C'est une plante sauvage originaire d'Amérique du Nord, où elle est commune dans une grande partie des États-Unis et du Canada.Il est aussi possible de la voir en Amérique ...
