Pain is not just a message from injured tissues to be accepted at face value, but a complex experience that is thoroughly tuned by your brain. Pain is as volatile and hard to predict as weather, jostled by countless unknowable systemic variables — but especially the potent perceptual filters of the brain. The results are often strange and counter-intuitive: fascinating cases of trauma ...

The answer is that in a rich medium (that is, one containing glucose) B. subtilis accumulates a metabolite that induces an enzyme that, in turn, inhibits PtsZ (again!) and delays cell division. Thus, in a rich medium, the cells grow just a bit longer before they can initiate and complete division [ 25 . 26 ].
