Self psychology, a modern psychoanalytic theory and its clinical applications, was conceived by Heinz Kohut in Chicago in the 1960s, 70s, and 80s, and is still developing as a contemporary form of psychoanalytic treatment. In self psychology, the effort is made to understand individuals from within their subjective experience via vicarious introspection, basing interpretations on the ...

Self psychology - Wikipedia

Karen Horney, in her 1950 book, Neurosis and Human Growth, based her idea of "true self" and "false self" through the view of self-improvement, interpreting it as real self and ideal self, with the real self being what one currently is and the ideal self being what one could become. (See also Karen Horney § Theory of the self).
