Friction is the force resisting the relative motion of solid surfaces, fluid layers, and material elements sliding against each other. There are several types of friction: Dry friction is a force that opposes the relative lateral motion of two solid surfaces in contact. Dry friction is subdivided into static friction ("stiction") between non-moving surfaces, and kinetic friction between moving ...

Oligopeptidase B (OPB) is the least studied group from the prolyl oligopeptidase family. OPBs are found in bacteria and parasitic protozoa and represent pathogenesis factors of the corresponding infections. OPBs consist of two domains connected by a hinge region and have the characteristics of conformational dynamics, which include two types of movements: the bridging/separation of α ...

A great solution for researchers in the field of cell biology! The automatic cell counter LUNA-II proved to be a lifesaver for my research with HeLa and C6 cells, as well as blood cells, to quickly count cells and determine viability. The device is very easy to operate and has a clear interface with a good touch screen for manipulation.

Multi-supply voltage techniques require level shifters on signals that go from one voltage level to another. Without level shifters, signals that cross voltage levels will not be sampled correctly. It is suggested that formal techniques be used in the design flow to identify missing level shifters. Finding these missing definitions early will save time in... » read more
