Home » Suicide Prevention
In 2017, over 47,000 Americans age 10 or older died by suicide. Suicide is the second leading cause of death among individuals ages 15 to 34, the third leading cause of death among children in the age range of 10–14 years old, and the fourth leading cause of death in those aged 35 to 54 (1, 2). However, the greatest increase in the suicide rate has been in those over the age of 45 ().
