of distance" will be the single most important economic force shaping all of society over the next half century. In her remarkably pro Geography, borders, time zones--all are rapidly becoming irrelevant to the way we conduct our business and personal lives, courtesy of the communications revolution.

The Death of Distance: How the Communications Revolution ...

The death of distance Frances Cairncross It is sometimes said that the internet, and the way companies use it, does not represent a radical change from what went before. An email is just an electronic memo, and a corporate intranet is not so different from the proprietary networks that were widely installed in the late 1980s and early 1990s.

astronomer is giving a lecture in a planetarium, a shot rings out and one of the audience members is found dead. A tough detective and a brassy female reporter lock horns as they both try to break the case.

Death from a Distance (1935) - IMDb

An important part of the former is geographical opportunity, which is usually proxied by some measure of the distance between the interacting parties. Certain well-publicized strands in the globalization literature have revived older notions that the importance of distance is decreasing along with the declining cost of interaction and have announced 'the death of distance' and even 'the end of geography'.

the actual costs of engaging in international trade. That is, with improvements in technology, distance-related components of trade costs – things like freight rates, insurance premiums, and inventory costs – should fall.

Revisiting the death of distance | VOX, CEPR Policy Portal

The Death of Distance: How the Communications Revolution Is Changing Our Lives - Distance Isn't What It Used To Be. 5/14/2001. Though The Death of Distance 2.0 began as a simple update of the 1997 edition, it quickly became evident that a major renovation was in order to reflect the speed of technological change in Internet and wireless usage. Says Cairncross: "It soon became clear that so much of what had been prediction was now fact that a completely new text was needed."

In this paperback edition of the acclaimed book *The Death of Distance*, journalist Frances Cairncross of *The Economist* shows us how the world is changing with the introduction of the Internet and wireless technology. First published in 1997, Cairncross's provocative book—based on evidence from two sweeping surveys on telecommunications—argues that new communications technologies are rapidly obliterating distance as a relevant factor in how we conduct our business and personal lives.
