Landscape ecology has been defined in various ways partly because the word 'landscape' means quite different things to people with different scientific and cultural backgrounds. Landscapes are spatial mosaics of interacting biophysical and socioeconomic components (Figure 1). Just as in other ecological disciplines, a spectrum of views exists as to the relative salience or prominence of the ...

Landscape Ecology - an overview | ScienceDirect Topics

Yet the ecology of agricultural-dominated landscapes is only now receiving the scientific attention it has long deserved. This attention has been stimulated by the realization that all agriculture must become sustainable year after year while leaving nearby ecosystems unaffected.

Ecology in Agriculture | ScienceDirect

The goal of this special section of Landscape Ecology is therefore to further motivate landscape ecologists to pursue both fundamental and applied aspects of landscape-pollination ecology. ... This has important implications for butterfly conservation and restoration of degraded agricultural landscapes.

The landscape ecology of pollination | SpringerLink

Agricultural crops are prominent features of an increasing number of variously perturbed ecosystems and the landscapes occupied by these ecosystems. Yet the ecology of agricultural-dominated landscapes is only now receiving the scientific attention it has long deserved.

The Ecology of Agricultural Landscapes: Long-Term Research ...

Certainly, 'landscape' is a central concept in landscape ecology. It is, however, defined in quite different ways. For example: Carl Troll conceives of landscape not as a mental construct but as an objectively given 'organic entity', a harmonic individual of space. Ernst Neef defines landscapes as sections within the uninterrupted earth-wide interconnection of geofactors which are defined as ...

Landscape ecology - Wikipedia

Lowland agricultural landscapes form typical 'landscape mosaics', with intermingled patches of woodland, arable fields and pasture, divided by hedgerows and roads Much of landscape ecology has developed around the paradigm of a landscape mosaic consisting of patches (of e.g. habitat) arranged in a matrix (the predominant habitat or landcover), with elements that can be described as ...
