WebSphere Application Server 7 Developer

There is a vulnerability in the Apache log4j library used by IBM WebSphere Application Server in the Admin Console and UDDI Registry application and used by the IBM WebSphere Application Server Liberty for z/OS in features zosConnect-1.0 and zosConnect-1.2. This has been addressed in IBM WebSphere Application Server by removing log4j from the Admin Console and UDDI Registry application.

Security Bulletin: Multiple vulnerabilities in Apache ...

In the Servers view of Eclipse, right-click to define a new WebSphere Liberty server. This opens a wizard to guide you through the process. The wizard includes the option to download and install the runtime as a part of defining a new server.

WebSphere Liberty for developers - IBM - United States

In other words, when there is a request from the client, the application server process the business logic and makes a call to the database to retrieve the relevant data. Application Server vs. Web Application Server. An application server is distinct from but often works in conjunction with, a web application server.
